MPEP §1206, APPEAL BRIEF CONTANT (5):

(5) *Summary of Invention.* A concise explanation of the invention defined in the claims involved in the appeal. This explanation is required to refer to the specification by page and line number, and, if there is a drawing, to the drawing by reference characters. Where applicable, it is preferable to read the appealed claims on the specification and any drawing. While reference to page and line number of the specification may require somewhat more detail than simply summarizing the invention, it is considered important to enable the Board to more quickly determine where the claimed subject matter is described in the application.

The Appeal Brief does not contain concise explanation of the invention, which should clearly show how to read the appealed claims on the specification and any drawing with reference to page and the line number of the specification.
